• Design & Engineering

- ✓ We provides clients with engineering expertise throughout the project lifecycle, from feasibility studies and scope documents to design conceptualization, construction management and post-construction evaluations. Its objective is to provide integrated, client-driven consulting engineering and design solutions that help companies attain a competitive edge in the market. The team of professionals has the best resources and proficiency in delivering fast and accurate results that ensure value addition at every stage of work, contributing to the project's success.
- ✓ **Basic Engineering** – This includes preparation of Feasibility studies, Pre-project reports and technical studies, Architecture & Master layout and transportation Planning, Electrical & Mechanical conceptual schemes and system design, sizing and selection of equipment, facilities, Environment and Air Quality Control Services, Sustainability and green technology solutions etc.
- ✓ **Detailed Design Engineering** – This includes Architecture, Civil Engineering, Structural Design, Electric power systems, Instrumentation, Communication and Automation systems, Piping systems, Environmental control systems, Heating, Ventilation, Air-Conditioning systems, Drainage and Sewerage systems, Road and railway systems, Scrutiny/ Approval of Vendors' Designs and Drawings.

(Please **contact us** for additional information you would need on this services or any other value added services which suite your company)

- **Design-Build Projects**

- ✓ Design-Build construction is exactly what it sounds like – a delivery method that provides the owner with a single point of contact for both the design and construction phases of a project. In other words, a Design-Build contract offers the owner single-source accountability. That means the Design-Build contractor is responsible for managing the design, construction and risk of the project – from start to finish.
- ✓ It's a simple approach that can tackle a complicated build. It puts architects, estimators, engineers, owners and builders at the same table. Literally. When you have an organized flow of information across the Design-Build team, it paves the way for creative solutions. Schedules are streamlined, costs are minimized and efficiencies are realized.
- ✓ At GTARB, we partner with select architects, engineers and construction professionals from across the country to create a Design-Build team that perfectly matches the unique demands of any given project. Our teams are some of the most respected in the business. They pride themselves on their ingenuity in solving problems and creating environments that motivate and inspire. Each team we build is an all-star cast selected specifically for the task at hand.

(Please **contact us** for additional information you would need on this services or any other value added services which suite your company)

- **Material Procurement Services**

A key element in the execution of any project is procurement of Materials. GTARB will take complete in-charge of sourcing new suppliers, buying, expediting orders, inspecting the manufacturing of equipment and bulk material as well as organizing delivery and logistics.

- ✓ Each project team has the ownership of its budget and delivery and is supported by the expertise and processes.
- ✓ GATRb is a global player that sources competitively worldwide and can provide support to clients through the provision of dedicated procurement services.
- ✓ GTARB Procurement Team is responsible for the coherence of procurement policies and strategies across the clients and we must follow the policies and code of ethics.
- ✓ Develop and implement Procurement strategies to improve competitiveness
- ✓ Increase the Supplier base through the sourcing and qualification of new suppliers and products, with a focus on High Value Procurement countries
- ✓ Develop and manage long- term relationships and partnerships with GTARB top Suppliers
- ✓ Promote design-to-cost solutions
- ✓ Gather and report information critical to operations

(Please **contact us** for additional information you would need on this services or any other value added services which suite your company)

- **Project Management Consultancy**

GTARB aims at being the Project Management Consultancy (PMC) contractor of choice by supporting its customers' business objectives and consistently delivering projects with outstanding safety and environmental performance that meet cost, schedule and quality targets.

- ✓ As a single point of contact or as part of an integrated management team with the customer, we apply PMC best practices and management skills developed on many completed projects, to assist our customers in achieving their business objectives.
- ✓ From the Technology & Licensor selection phase to the management of multinational consortia in the execution & successful delivery of world-scale, lump-sum turnkey projects, GTARB has the required project management experience and its goal is to be its customers' PMC contractor of choice.
- ✓ Doing PMC by GTARB ensures customers can manage their project risks in a pro-active way and achieve their business objectives.
- ✓ At GTARB, teamwork is something in which we take great pride, there was great saying "no matter how hard you work, one man can't do everything".
- ✓ Whether there are seven areas of focus or 700, we have carefully put systems in place to keep things running smoothly, on-time and within your desired budget. GTARB proud to say that we've never delivered anything less.

(Please **contact us** for additional information you would need on this services or any other value added services which suite your company)
